

eLabel is a web based tool that enables you to create and print address labels, and scan and record your courier tickets – no more hand writing address labels and messing around with fiddly ticket stubs.

eLabel Take control of your courier requirements.

Looking for a tool that uses your existing courier tickets but gives you the power to book, label, manage, track and report your courier items, all from the comfort of your desk?

THEN NEW ZEALAND COURIERS' eLABEL IS FOR YOU.

eLabel is a web based tool that enables you to create and print address labels, and scan and record your courier tickets – no more hand writing address labels and messing around with fiddly ticket stubs. You can even make a courier booking with just a few clicks of your mouse. It will help your business reduce address errors, save time and money, and increase productivity. And best of all, it's free to select New Zealand Couriers customers like you.

It can be tailored to suit your company's freight and information requirements, and all despatch information is stored online – so you can easily track deliveries and access invaluable reporting information. eLabel is incredibly easy to set up, simple to use and can integrate with an optional hand-held scanner for scanning courier tickets to speed up the despatch process.

eLabel can be used by any number of users within a company, and because all customer and delivery information is securely stored on eLabel's web based platform, you don't have to worry about large amounts of data clogging up your system.

Say goodbye to losing track of what's been sent where, spending hours manually reconciling jobs and putting together reports based on hand-written ticket books. eLabel puts the control in your hands.

BENEFITS AT A GLANCE

- ➔ **Easy.** Simple to set up and use. Quickly and easily book jobs and print address labels straight from your computer.
- ➔ **Accessible.** Can be used on any computer with internet and printer access, including those at smaller or more remote locations, allowing you to streamline despatch operations throughout your organisation.
- ➔ **Fast.** Use a handheld scanner to record ticket information, and online address lists to have customer information automatically filled in.
- ➔ **Accurate.** Upload your entire customer address list to eLabel to save time and avoid errors.
- ➔ **Tailored.** Personalise eLabel to suit your business - rate your own tickets, add your customer charges, or create mandatory fields such as invoice number and cost centre.
- ➔ **Smart.** All customer and booking information is securely stored online. And because it's web based, you don't have to worry about complicated software installations.
- ➔ **Trackable.** Integrated track and trace means you can easily track deliveries online and email live tracking links to your customers.
- ➔ **Reportable.** Avoid sorting through countless courier stickers and stubs - eLabel offers a variety of reporting information at your fingertips.
- ➔ **Free.** Use your own computer and printer. No set up costs or ongoing technology costs. *

* We have setup options which include the purchase of handheld scanners and thermal printers. These time saving items are not necessary to achieve full eLabel functionality.
